Advanced Technology Lodging Access Solution

# Reliable, sophisticated security for hotels with specific needs

Few businesses manage information technology environments as demanding as hotels. Your access control system must integrate with existing IT infrastructures and systems, make guests feel comfortable, ensure that your staff is productive and adapt to future business needs.

For decades, ILCO has dedicated significant research and development resources to design comprehensive access control systems specifically for the unique needs of the hotel industry. Combining advanced technology with superior hardware and unparalleled support, ATLAS™, ILCO's Advanced Technology Lodging Access Solution, is the optimum choice for uncompromising hotel security.

- Easy Implementation
- Capitalization on existing IT infrastructure
- Connectivity between systems
- Scalable and customizable

# Connectivity Equals Efficiency

## **Pull Your Current Systems Together**

ATLAS uses an open architecture design in order to easily integrate with existing hotel systems including PMS, POS, self-check-in kiosks, cashless vending machines.

## **Capitalize on Existing IT Infrastructure**

ATLAS is designed to be installed easily and operate fully on existing IT infrastructures. Once installed on a server connected to the network, ATLAS can be used on any network workstation, minimizing disruption to existing hotel operations. A low cost off-the-shelf Palm OS® unit is used to program and audit locks.

# ATLAS Technology Optimizes Performance and Flexibility

## Easy Implementation

By simply connecting an encoder and logging in to ATLAS over the Internet, your front desk, concierge, and VIP check-in stations are quickly up-and-running, with no software to install on individual workstations. User-friendly interfaces with on-screen help let your staff immediately feel comfortable using the system after minimal training.

## Extensive Keycard Functionality

Guests can charge purchases, enter their rooms, access the parking garage, and play in casinos all with one keycard! Access data is on ISO track three, which frees up tracks one and two for other uses, such as POS and gaming systems. ATLAS offers essential keycard functions, including guest and staff keycards that auto-expire, limited-use keycards, emergency keycards and common door keycards. Staff keycards can be batch encoded and then assigned individually. For maximum security, previous guest and staff keycards are automatically cancelled when a new valid keycard is used in the lock.

## Powerful Auditing With Security and Productivity Monitoring

Comprehensive centralized auditing with a variety of built-in report templates allow management to trace security breaches and follow employees from lock to lock to monitor productivity. ATLAS system events and operations can be real-time monitored using a Monitoring Manager.

## Customizable Preferences

Selectable time zones and language options configure the ATLAS system for the individual needs of each hotel.

## Scalable, component-based design

ATLAS accommodates any size hotel from single-station operations to networked, large-scale, full-service facilities. With ATLAS, you can manage up to 50 check-in workstations, 16,000 guest rooms, and 8,000 suites.

The ATLAS system

## Live Customer Support 24/7

Any time you need technical assistance, immediate help from ILCO customer service is only a phone call away. This commitment is part of our world-class customer support program and upgraded ISO 9001/2000 certification.

**Call toll-free 24 hours a day, 7 days a week, 365 days a year**

**1.877.468.3555 (option 1)**

**Our new customer support web site** provides an interactive option for ILCO customers to obtain technical support, product and software updates, troubleshooting tips, FAQ's, and the latest promotions and industry news online.

**Visit <http://connect.kabalodging.com>**

Running low on supplies? Experienced ILCO customer service agents help you order keycards, cleaning cards, batteries, replacement parts and additional locks.

**Call 1.877.468.3555 (option 2) from 8:00 a.m. to 8:00 p.m. eastern time**

**Visit [www.keycard.com](http://www.keycard.com)**

# State-of-the-Art Hardware for Total Access Control

## Heavy-Duty Door Locks

For superior guest room security, ATLAS uses high-performance ILCO Solitaire and Generation E-760 electronic locks. With keycard reader technology, full audit accountability and override capability, these stand-alone locks provide maximum security without compromising ease of use. A selection of designer finishes complements your hotel decor.

## Remote Access Controller

Make your guests feel privileged and secure by regulating access to restricted areas such as executive floors, spas, health clubs, elevators and parking areas. The streamlined Remote Access Controller functions ideally in areas where it is impractical to mount a standard electronic door lock.

### Simplex® 5000 Pushbutton Lock

A convenient, durable access control alternative. This fully mechanical pushbutton lock does not use keys or cards; a changeable combination opens the lock. The Simplex 5000 Pushbutton lock is convenient for store rooms, offices, and many other back-of-the-house areas.

## In-Room Safes

Allow guests to secure their valuables without relying on staff. A PIN and / or credit cards can be used to access the safe.

## Hospitality Accessories

ILCO provides economical, reusable custom-designed keycards plus do-not-disturb signs, card holders, and cleaning cards manufactured under stringent ISO guidelines to meet ABA specifications.
