Smart City Hostels make a "smart" choice and select Guest Centrix

Smart City Hostel is a 5* Hostel in Edinburgh. This is a new hostel concept, offering all you'd expect from a hotel but at hostel prices. Located in the centre of town next to the historic Royal mile and close to the famous Edinburgh Castle it provides an ideal base for exploring the city.

CMS Hospitality are pleased to announce that Starboard Hotels have selected the market leading Guest Centrix PMS for use in Smart City Hostels in Edinburgh.

Frazer Callingham of Starboard Hotels Ltd said "After exploring all of the products currently on the market, we are confident that the Guest Centrix product is ideally targeted at the running of the hostel concept. As the group is on the verge of growing and developing new hostels we are confident that the working relationship developed with CMS Hospitality will mean that the two businesses will grow in tandem."

Paul Staveley, Director of Sales Europe said "I am delighted to have secured the contract to provide our market leading software to Starboard Hotels. I look forward to many years of providing them with our systems as they look to grow in the UK and Europe".
