

You'll save **45%*** with ease,
using the industry's first comfort
and occupancy sensing energy
management service!

Your hotel's profitability is critical to your success, but so is your guests' comfort. The EcoManaged Energy Management System brings new patent-pending technology and years of proven hotel technology service together to save your property an estimated 45% – while ensuring ultimate guest comfort. Field tests have saved up to 70% of energy costs at some properties!

EcoManaged Features/Benefits:

- ROI is less than 18 months for most properties
- Patent-pending technology based on carbon dioxide detection
- "Comfort sensing" keeps guests comfortable, while saving you money
- Industry's first comfort sensing and occupancy detection
- Fully-managed service – no hassles
- Completely wireless using Wi-Fi network
- 5 minute install – only 1 device per room!
- Tax deduction/utility rebate assistance
- No batteries required
- Dedicated energy management support

*Field testing yielded an average energy savings of 45%.

No Hassles—A Fully Managed Energy Management Service

By providing a 21st century energy management service, rather than just a new widget to place on the wall, EcoManaged makes your cost savings and energy reduction effortless. As a centralized, cloud-based service, EcoManaged handles all of your efficiency needs. Access the system, view data and trends and adjust settings all via the web! Find out which rooms are most efficient or receive alerts regarding equipment malfunctions.

How EcoManaged Works

- Pre-qualify with a free energy assessment
- We upgrade your PTACs with EcoManaged units
- Ovation Networks handles all of your rebates
- EcoManaged automatically manages your heating and cooling
- You save money!
- Login to **EcoManaged.com** to monitor your energy savings and view reports

By using EcoManaged, you're eligible for up to \$0.60/sq. ft. in tax deductions.

With the EcoManaged service, we take the work off your plate of finding energy rebates and programs that could save you even more. Our team at Ovation Networks has been successfully providing Wi-Fi service to hundreds of hotels for over seven years, so we know hospitality and will provide your hotel with the best in customer service.

Minimal Equipment and Install—Maximum Savings

The EcoManaged unit, Comfortstat, has an easy 5 minute installation right onto your existing PTAC unit, and runs wirelessly—no hassle with changing batteries. And EcoManaged leverages the HSIA network, using Ovation Networks' Wi-Fi security—providing you with reliable Wi-Fi and reduced infrastructure costs.

EcoManaged is the First Service of its Kind to Save You This Much!

Field tested and proven, our patent-pending technology works for you, leveraging centralized data trending and carbon dioxide sensors to detect not only occupancy, but also the comfort of your guests. EcoManaged constantly analyzes real-time and historical data from your property and guests, providing you with valuable reports that help you become increasingly intelligent and energy efficient over time—ultimately saving more money! EcoManaged is unlike any other energy savings solution on the market.

Let Ovation Networks manage your heating and cooling system, saving you an estimated 45%, while you manage the rest of your hotel!
