We serve up clarity and reliability

Complexity should not compromise integrity

Hotels, casinos and resorts that use multiple POS and PMS systems spend exhausting hours compiling the financial data and confirming receipts from cash drops. With cash drops occurring at the end of each shift, several times per day, it can feel like you never catch up. Much less settle up. In fact, the numerous outlets and employees combined with error-prone manual processing make it difficult to discover small discrepancies in overs and shorts.

Compound even tiny mistakes by the variables involved and your hotel could suffer significant losses over time. To make matters worse, illegible handwritten cash drop notes and logs, as well as manual cash exchanges, restrict your ability to properly track violations and create accurate financial reports for audits.

Real time cash reports, served up any way you like

Evention replaces old time spreadsheets and slips of paper with real time software. SecureDrop software makes cash and house bank management more productive and precise. It imports and automatically aggregates POS and PMS data from multiple systems throughout the property, enabling you to:

- Generate instantaneous cash reports daily, weekly, monthly, or any date range needed
- Track cash drops by employees, shifts, days, outlets, or specific POS stations
- Track over/short violations with complete histories, instant reports, and cash violation forms
- Configure cash journaling to your specifications from the point of drop through to the posting to the general ledger
- Simplify preparation of audits and month-end financial reports
- Simplify workflow communication regarding over/shorts, bank audits, and cash journals

“SecureDrop is a huge benefit in shared services environments. You’ll still have cash discrepancies, but with SecureDrop you’ll see them faster because the reports are timely, so you can take action more quickly.”

– **Director of Finance**, Chicago Hotel

“SecureDrop bridges the gap between the different software that makes up our primary account system. Due to the number of steps and manual processes, chances for error were significantly higher before we started using Evention.”

– **Controller**, Chicago Hotel

The most accurate and advanced cashier drop management solution

Evention has revolutionized the integrity of cash and house bank management by enabling hotels to accurately and quickly verify and consolidate financial data from cashier drops, immediately detect variances from the POS and PMS, and eliminate repetitive violations that manual processing may overlook.

SecureDrop automates an error prone manual process and seamlessly integrates the data with any major accounting software system, while providing precise tracking reports by individual employees, day, and outlet.

- **Documentation:** Proprietary software eliminates inexact deciphering of handwritten notes by automating data entry for cash drops. Employees enter and verify the cash amount on a screen and receive a printed receipt of each of their cash drops. Meanwhile, the software keeps a digital record of all drops for future reporting.
- **Accuracy:** SecureDrop helps ensure integrity in the face of complexity by automatically aggregating the cash drops from multiple POS and PMS systems across a property. The software quickly cross-references cash drops with the POS and PMS data to identify even the smallest of discrepancies.
- **Immediacy:** Variances and cash violations can be addressed immediately – allowing you to caution or re-train employees before cash handling mistakes become habitual. You can also track all offenses over any date range to support a case for dismissal.
- **Reconciliation:** Duebacks are automated which not only streamlines the timely process of manually doling out payments, but protects the property from incorrect cash exchanges.
- **Ease of Use:** Our software is compatible with all leading accounting, POS and PMS systems used by hotels. Evention is web-based for easy access from any device with an internet connection and offers 24/7 customer support.

The more hotels, casinos and resorts expand their POS and PMS systems, the more effectively SecureDrop protects their financial integrity. And as more properties adopt our software, it's increasingly clear that manual methods can't keep pace or match the precision of automating the entire cash handling reconciliation and reporting process. Easy. Efficient. Evention.

SecureDrop's Automated Process:

1.

*Electronic drops
or cash machine*

2.

*Import POS
and PMS data to
automate audit*

3.

*Instant over/short
reports and
cash journal*

4.

*Upload to
general ledger*

5.

*Workflow
messaging for
cash violations and
bank audits*

About Evention

We are a software development company that automates, simplifies and improves the accuracy of niche accounting and operations processes, primarily for the hospitality industry. Evention products are web-based solutions that enhance operational productivity.
