

6 Auto Email Reports Every Hotelier Needs

Introduction

Hotel operations move fast and at times it can feel like there are a dozen fires to put out. As a hotelier, you want to spend your time growing your business and maintaining your vision. But you also want to remain ever-vigilant about threats to the bottom line.

Inn-Flow's auto email reports deliver vital labor and accounting analytics in order to free up your time and energy. By automatically emailing out key reports, your managers, co-owners, executives, and departmental heads will be better able to independently keep things on track. Now you can focus on the bigger picture.

I love the automated emails and the selection of reports Inn-Flow offers to users. In a growing company like ours, it's important for owners and developers to look for ways to be more time efficient. Instead of having to log in to check on our numbers, I just check the daily reports the Inn-Flow software generates and sends automatically.

- Anish Govan, Vice President at Five Star Hospitality & Development Group

Set it and Get it!

Set up reports to email to individuals or to specific positions. For example, you can identify a selection of reports you want your GMs to receive on a regular basis. As you grow your portfolio and add new GMs they will instantly get the reports corresponding to their position. This “Set it and Get it” system insures that each member of your management team instantly gets the data they need to efficiently manage their department.

Reports can be read right from your inbox, taking out the added step of logging into Inn-Flow’s software. It is simpler, less time-consuming oversight. This is the end of those “*I didn’t see or notice that...*” excuses.

Top 6 Auto Emailed Reports

Auto email reports are very customizable. Set them up to go out Daily, Weekly, Monthly or Annually; include individual users or particular roles; and fine-tune hundreds of version of auto emails to help you stay in step with the changing demands of your operations.

As an Inn-Flow subscriber, you will have instant access to these popular reports and many more.

1. Daily Flash

Inn-Flow has a number of different versions of Daily Flash reports. Once you find the one that suits your needs, you can customize it — including some or all of your portfolio — and begin delivering them to the inboxes of the people who manage your operations.

Version 1:

This is one of the most popular Daily Flash reports. It shows the trailing 7 days of your properties, and gives you quick stats, like revenue trends, comparing month-to-date (MTD) this year to the same period last year. With this snapshot of financial health, your managers will be ready to make important operations changes to impact your bottom line.

2. Controllable Expenses

Pulling in the Inn-Flow [Adjusted Budget / Flow through analysis](#), an important feature that tells you what you should have spent based on actual business levels, this reports is a catalyst for conversation among your hotel managers. Utilize it to get your GM talking to all of the department heads about where they currently stand, so there will be **no surprises** at the end of the month.

* This report includes the following active accounting period. Items for this accounting period should not be considered final.
(3/30/11)

Best practices

- Send a customized, controllable expense report out to your department heads automatically on a weekly basis
- Tailor the report to include any departments and chart of accounts that you feel your managers should be watching
- Have your department heads sign off and add comments as well — everyone is held accountable

3. Weekly Segmentation

The Weekly Segmentation report runs Sunday to Saturday, just like your Weekly STAR report. It is easy to draw attention to both the positives and negatives when you use this report to evaluate your weekly STAR report. After careful analysis, your team will be empowered to utilize insights from these reports to establish better revenue management strategies, which will improve your bottom line.

The example report below shows the hotel received 31% of their business from internet sites at an average daily rate of \$44.55 — not the most favorable outcome! They may want to ask themselves: *Should we put additional restrictions on our internet rates to avoid this in the future?*

- Guide your team in their initial analyses and conclusions, but encourage them to self-correct as time goes on

4. Housekeeping Assignments

Your management team needs to keep a close watch on the productivity of your staff. This color-coded report shows room types assigned to each housekeeper, as well as their budget based on cleaning service levels, and the actual time they took to clean. From the example, any manager could see that Bonny needs additional training to keep pace with budgeted hours.

EMPLOYEE		CLEANS SERVICE LEVEL				TOTAL ROOMS	BUDGET MFOR		ACTUAL MFOR		VAR. TO BUDGET		BUDGET TOTAL		ACTUAL TOTAL		VAR. TO BUDGET	
EMP ID	EMP NAME	CHECK OUT	REFRESH	STAYDOWN	MINS		MINS	MINS	MINS	DIFF	DIFF	DIFF	DIFF	DIFF	DIFF	DIFF	DIFF
