SELF-SERVICE
POINT OF PURCHASE
FOR UNATTENDED RETAIL

impulsify.

With a sleek, stylish and compact design, the TP5 is perfect for even the most confined POS locations. The TP5 features a TruFlat projected capacitive touchscreen, quad-core CPU, and integrated receipt printer.

Resilient Touch Display
The TP5 features a 14" widescreen LCD with TruFlat projected capacitive (PCAP) multi-touch technology built to take the rigors of heavy everyday use.

Beautiful and Functional
Built on a sturdy aluminum frame, the ION TP5 delivers a durable modern look while maintaining a small footprint, saving valuable counter space.

Integrated Printer
The integrated printer means no external printer cables creating a clean, cable free environment.

Environmental Resistance
With an IP54 Ingress Protection Rating. The TP5 was designed to withstand harshest of environments.

Cost Effective Performance
Built on Intel's mobile Bay Trail technology, the fanless ION TP5 is powerful and durable enough to handle the most demanding applications.

INGENICO iUC285

PCI PTS 4.x certified, the iUC285 meets the highest and latest hardware and software security requirements.

The iUC285 also complies with SRED and provides flexible options with Open Protocol modules.
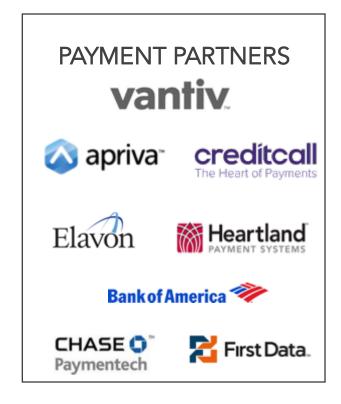

Payment Options
Certified, Unattended Retail Terminal

CUSTOMIZATION Add-Ons

HARDWARE	SOFTWARE
Wall Mount Bracket	White Labeled, Branded Screens
Stand Alone Units Available	PMS Integration (if not currently available)
Integrated Millwork Installations	Additional 3rd Party Integrations
Multi-Directional Scanner	Payment Processor Requests
Cash Drawer	
Wireless Keyboard	
	Customization requests may require billable development to deliver.

UNLIMITED CUSTOMIZATION POSSIBILITIES TO MEET
EVER BRAND, DESIGN TECHNOLOGY REQUIREMENT

As a cloud-based payment solution, ShopPoP is hardware agnostic and can be configured multiple ways to meet brand, design, and technology requirements.

The only non-configurable items are the use of Windows OS and the Certified Unattended Payment terminal required to meet PCI Compliance and Impulsify's robust security measures to ensure guest credit card security in any environment.

TRANSACTION FLOW Payments

Step 1. Credit card sale is selected by guest using ImpulsePoint.

Step 2. Integrated Kiosk Manager notifies Terminal of pending transaction

Step 3. Terminal initiates transaction with Gateway

Step 4. Gateway executes transaction with client's processor of choice

Step 5. Gateway returns result to Terminal

Step 6. Terminal returns transaction details to Kiosk Manager

Step 7. ImpulsePoint pushes successful sale to PMS
