

## MOBILE CONCIERGE GUEST APP

# SELL EVERYWHERE TO ANYONE. REVENUE ACCELERATOR IN YOUR GUEST'S POCKET.

A perfectly designed **SaaS solution** for hospitality providers. Unprecedented convenience when ordering services and instant processing of payments in an elegant app.

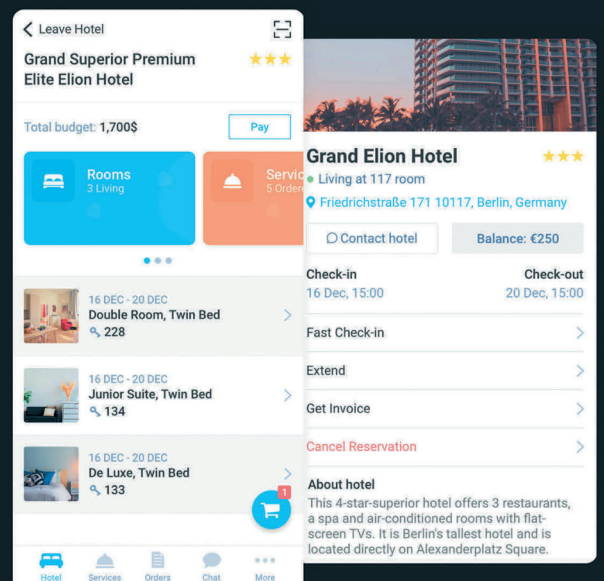

## Digital Ordering

- Creating the app service menu by selection from a huge catalog.
- Booking and ordering via the client's smartphone.
- Selectable delivery zone. The service comes wherever the Client desires.
- Selectable delivery time. No delays, no waiting time, no nerve-wracking.
- **Virtual mobile POS** - payments are made through the client's smartphone with ApplePay or credit card.
- Payments are instantly processed by the system, no extra hardware is needed.

## Revenue Booster

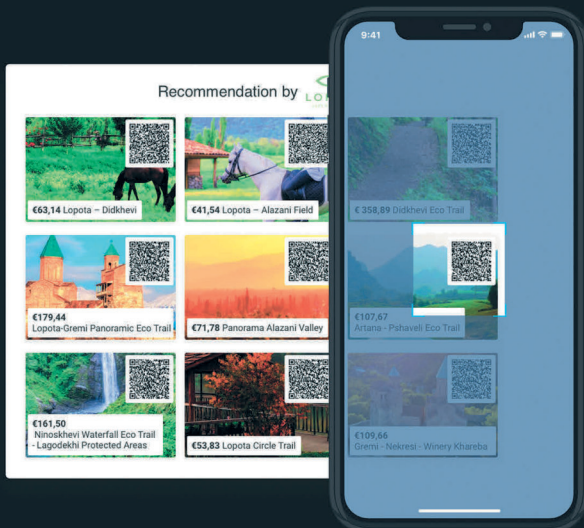

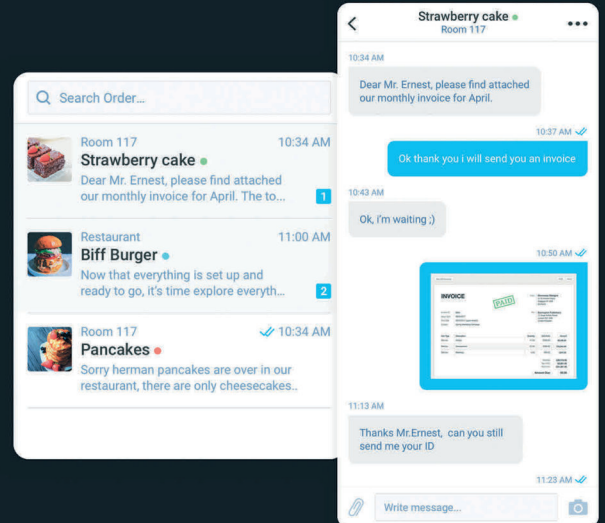

- Higher sales through visibility and accessibility.
- **Cost-effectiveness** - monthly subscription, no hardware costs.
- Reduced operations thanks to well-organized processes.
- Word-of-mouth recommendations - lower advertising expenses.
- No training and maintenance costs.
- Statistics and reports for assessing financial performance.

## Communication

- Easy communication with staff through the [Direct Chat](#).
- Comprehensive order history.
- Notifications on the changes in service status.
- Possibility to order without registration.
- Possibility to choose the exact time and delivery zone.
- Multilingual/multicurrency.

## Self Service Assistant

- Better user experience and higher accuracy when clients make bookings and orders on their own.
- Automation - discounts and the preferred currency are applied automatically to all purchases.
- Independent and flexible payments without paper bills.
- Much better accessibility and visibility of services thanks to QR codes, on [Digital service card](#) and social media, which results in a boost of upsells.
- Exclusive mobile deals and incentives for the app use promotion.

## Digital Information System

- Adding any data that might be interesting to clients - info blocks and info pages - in [Mobile Portfolio](#).
- Convenient CMS for showcasing everything on offer, updating and modifying it easily.
- Automatic translation of content into multiple languages without any extra costs.
- Space for advertisers.
- Synchronization of digital app content with the website.
